JUnit - executables

Czym jest executable?

```
import org.junit.jupiter.api.function.Executable;
```

```
@FunctionalInterface
@API(status = STABLE, since = "5.0")
public interface Executable {
   void execute() throws Throwable;
}
```

```
public class ExecutableExample implements Executable {
    @Override
    public void execute() {
        assertEquals(2, 3);
    }
}
```

JUnit – inny sposób użycia

Java – bloki statyczne

```
public class StaticBlocks {
    private static List<String> staticList;
    private List<String> notStaticList;
    static {
        // to moge zrobić bo staticList jest statyczne
        staticList = Arrays.asList("STR1", "STR2", "STR3");
        System.out.println("BLOK STATYCZNY");
    public StaticBlocks()
        notStaticList = new ArrayList<>();
        staticList.contains("STR1");
        System.out.println("KONSTRUKTOR");
```

BLOK STATYCZNY KONSTRUKTOR

Java – mapy

Czym jest mapa?

- Kontener przechowujący pary. Wszystkie pary to tzw. EntrySet
- Każda para to tzw. Entry
- Każda para, tzn. Entry, składa się z klucza (key) i wartości (value)
- Kazdy klucz może pojawić się w mapie tylko raz

Java – mapy, klucze i wartości

```
final Map<Integer, String> indexToMonthName = new HashMap<>();
indexToMonthName.put(1, "STYCZEN");
indexToMonthName.put(2, "LUTY");
indexToMonthName.put(3, "GRUDZIEN");
```

```
indexToMonthName.get(1);
```

```
boolean containsKeyTwo = indexToMonthName.containsKey(2);
```

```
boolean containsStyczen = indexToMonthName.containsValue("STYCZEN");
```

Java – mapy, cd.

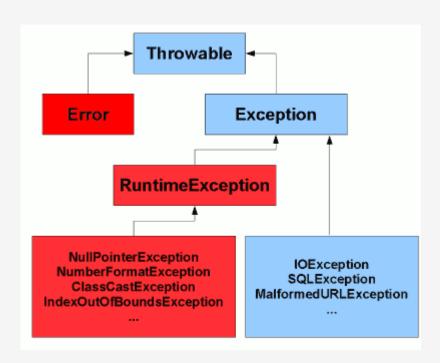

```
indexToMonthName.entrySet().forEach(entry ->
System.out.println(entry.getKey() + " " + entry.getValue()));
```

```
indexToMonthName.forEach((key, value) -> System.out.println(key + " " + value));
```

- 1 STYCZEN
- 2 LUTY
- 3 GRUDZIEN

Java – wyjątki

Java – wyjątki

Każdy wyjątek posiada:

- Wiadomość wyjątku
- Przyczynę wyjątku (tzn. poprzedni wyjątek, który go wyrzucił
- StackTrace: stos wywołań metod, który przyczynił się do wyrzucenia wyjątku

```
new Throwable().getMessage();
new Throwable().getCause();
new Throwable().getStackTrace();
```

Java – wyjątki

```
public static void showingExceptionWithCause() {
    try {
        new FibonacciSeries().compute(-1);
    } catch (final IllegalArgumentException exp) {
        System.err.println("Failed to compute fibonacci serie value");
        throw new FibonacciSeriesException(exp.getMessage(), exp);
    }
}
```

Oryginalny exp (IllegalArgumentException) jest POWODEM (tzw. cause) wyrzucenia wyjątku FibonacciSeriesException

Java – cause

```
public static void showingExceptionWithCause() {
    try {
        new FibonacciSeries().compute(-1);
    } catch (final IllegalArgumentException exp) {
        System.err.println("Failed to compute fibonacci serie value");
        throw new FibonacciSeriesException(exp.getMessage(), exp);
    }
}
```

```
"C:\Program Files (x86)\Java\jdk1.8.0_131\bin\java.exe" ...

Failed to compute fibonacci serie value

IDEA – poprawne importowanie projektów

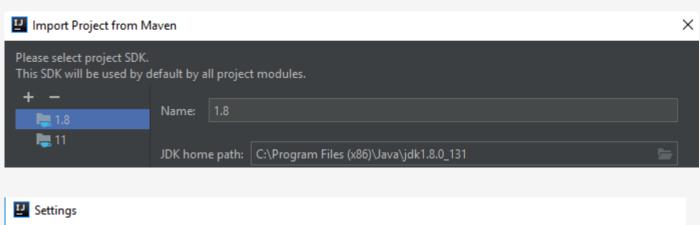

IDEA – poprawne importowanie projektów

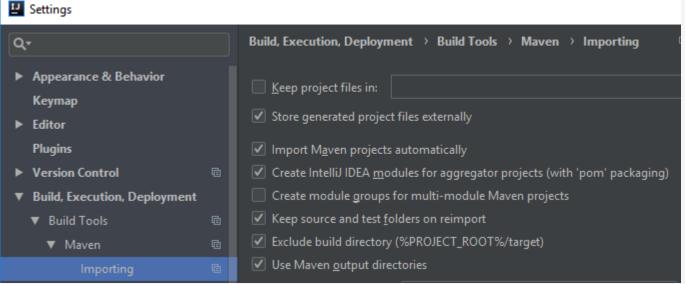

Import Project from Maven	
Root directory E:\dev\Java\spam_projects\sdatdd2	
Search for projects recursively	
Project format:	
Synchronize Maven project model and IDEA project model each time when pom.xml is changed	
☑ Import Maven projects automatically	
✓ Create IntelliJ IDEA modules for aggregator projects (with 'pom' packaging)	
Create module groups for multi-module Maven projects	
✓ Keep source and test folders on reimport	
✓ Exclude build directory (%PROJECT_ROOT%/target)	
✓ Use Maven <u>o</u> utput directories	
Generated sources folders: Detect automatically	
Phase to be used for folders update: process-resources	
IDEA needs to execute one of the listed phases in order to discover all source folders that are configured via Maven plugic Note that all test-* phases firstly generate and compile production sources.	
Automatically download: Sou <u>r</u> ces <u>D</u> ocumentation	
Dependency types: jar, test-jar, maven-plugin, ejb, ejb-client, jboss-har, jboss-sar, war, ear, bundle	
Comma separated list of dependency types that should be imported	
Environment settings	
Services News County Library
